Amlodipine N-Lactoside (Mixture of Diastereomers)

CAS 2173291-00-2 · CATO catalogue no. C4X-109510

Structure - for identification

Molecular formula	C32H45ClN2O15
Molecular weight	733.16
Appearance	Pale Yellow Solid
Storage	-20 degC+/-5 degC
Purity	Typical 98%
Assay / content	95.5%
HS code	2933.39.90.99
Country of origin	China
InChIKey	PVUFUYMVELLVFD-XHJFUNIMSA-N

About this standard

Amlodipine N-Lactoside (Mixture of Diastereomers), CAS 2173291-00-2, C32H45ClN2O15 reference standard from CATO.

Pack sizes and lead time

25 mg	In stock
50 mg	In stock
100 mg	In stock

Quantities above the listed pack sizes are quoted on request. Prices are quoted per enquiry - no price list is published on this site.

Documentation on file

- Certificate of analysis - issued per lot, with the analytical basis for the assigned content or purity.
- Safety data sheet - supplied for the catalogue item and used for the transport classification.
- Chromatograms or spectra - tell us what your method or filing needs and the quotation will state what can be provided.

How to order

Send the catalogue number (C4X-109510), the pack size and the quantity to chao.lu@cato-chem.com. The reply covers availability, lead time, documentation and shipping for the specific lot, usually within one working day.
