Clavulanate EP Impurity E

CAS 1260617-10-4 · CATO catalogue no. C4X-114611

Structure - for identification

Molecular formula	C16H18N2O10
Molecular weight	398.32
Appearance	Pale Yellow Powder
Storage	-80 degC+/-5 degC
Purity	Typical 92.024%
Assay / content	87.7%
Country of origin	China
InChIKey	WDFKSRMFLRKPLO-BJBUEPEESA-N

About this standard

Clavulanate EP Impurity E, CAS 1260617-10-4, C16H18N2O10 reference standard from CATO. Batch COA and MSDS available, shipped worldwide.

Pack sizes and lead time

10 mg	10 days
25 mg	quoted on enquiry

Quantities above the listed pack sizes are quoted on request. Prices are quoted per enquiry - no price list is published on this site.

Documentation on file

- Certificate of analysis - issued per lot, with the analytical basis for the assigned content or purity.
- Safety data sheet - supplied for the catalogue item and used for the transport classification.
- Chromatograms or spectra - tell us what your method or filing needs and the quotation will state what can be provided.

How to order

Send the catalogue number (C4X-114611), the pack size and the quantity to chao.lu@cato-chem.com. The reply covers availability, lead time, documentation and shipping for the specific lot, usually within one working day.
