All-rac-alfa-Tocopherol EP Impurity A (Mixture of Diastereomers)

CATO catalogue no. C4X-119516

Structure - for identification

Molecular formula	C29H50O2
Molecular weight	430.71
Storage	-20+/-5 degC
Purity	Typical 98.5%
Assay / content	97.8%
Country of origin	China

About this standard

All-rac-alfa-Tocopherol EP Impurity A (Mixture of Diastereomers), C29H50O2 reference standard from CATO. Batch COA and MSDS available, shipped worldwide.

Pack sizes and lead time

25 mg	10 days
50 mg	10 days
100 mg	10 days

Quantities above the listed pack sizes are quoted on request. Prices are quoted per enquiry - no price list is published on this site.

Documentation on file

- Certificate of analysis - issued per lot, with the analytical basis for the assigned content or purity.
- Safety data sheet - supplied for the catalogue item and used for the transport classification.
- Chromatograms or spectra - tell us what your method or filing needs and the quotation will state what can be provided.

How to order

Send the catalogue number (C4X-119516), the pack size and the quantity to chao.lu@cato-chem.com. The reply covers availability, lead time, documentation and shipping for the specific lot, usually within one working day.
