alpha-Amanitin

CAS 23109-05-9 · CATO catalogue no. CCFD200529

Structure - for identification

Molecular formula	C39H54N10O14S
Molecular weight	918.97
Appearance	White to Yellow Solid
Storage	-20 degC+/-5 degC
Purity	Typical 95.9%
Country of origin	China
InChIKey	CIORWBWIBBPXCG-SXZCQOKQSA-N

About this standard

alpha-Amanitin, CAS 23109-05-9, C39H54N10O14S reference standard from CATO. Batch COA and MSDS available, shipped worldwide.

Pack sizes and lead time

1 mg	In stock
10 mg	quoted on enquiry

Quantities above the listed pack sizes are quoted on request. Prices are quoted per enquiry - no price list is published on this site.

Documentation on file

- Certificate of analysis - issued per lot, with the analytical basis for the assigned content or purity.
- Safety data sheet - supplied for the catalogue item and used for the transport classification.
- Chromatograms or spectra - tell us what your method or filing needs and the quotation will state what can be provided.

How to order

Send the catalogue number (CCFD200529), the pack size and the quantity to chao.lu@cato-chem.com. The reply covers availability, lead time, documentation and shipping for the specific lot, usually within one working day.

CATO Research Chemicals Inc. (Guangzhou CATO Technology Co., Ltd.)
